

LINEN HOME

We are a strong and dynamic fabric manufacturer in "Linen World".

Our Certifications

European Flax.
Premium linen fiber

OEKO-TEX®
Standard 100

OUR MISSION

Innovation Research

Develop particularly innovative fabrics with creativity, research, experimentation

Respect Nature

Naturally respectful flax/linen cultivation environment, commitment to advancing its practices

Sustainable Development

Responsible production and its impact on the environment and our planet

Our Product

Fabrics made with European linen and European Flax® certified are available in the collection

Flax fiber gives life to linen fabrics with exceptional properties:

- maximum resistance
- high capacity to absorb humidity
- insulating and thermo-regulating properties
- non-allergenic characteristics

Your Logo or Name Here

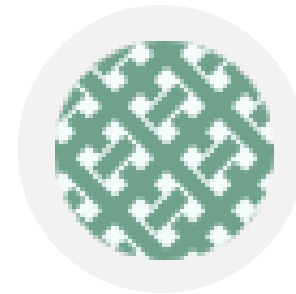

A Fascination with Flax

The exclusively 100% European origin of flax fiber (from France, Belgium and Holland) and the respect of the environment

Flax fiber gives life to linen fabrics with exceptional properties. soft, strong, moisture absorbent

Flax fiber gives life to linen fabrics with exceptional properties. soft, strong, moisture absorbent

LINEN: A NATURAL MATERIAL TO ENHANCE YOUR INTERIORS

Breathable

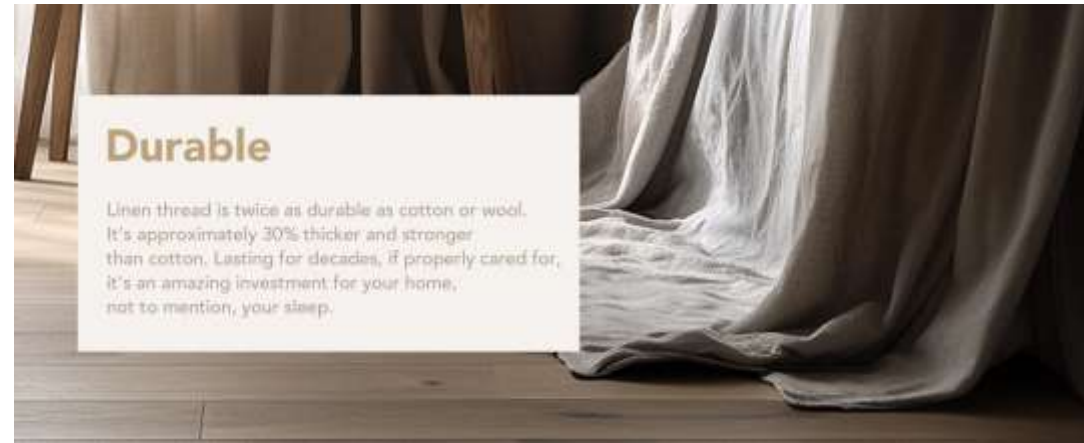

Flax linen benefits from high air permeability and is an efficient conductor of heat. It's a breathable fabric which regulates your temperature to keep you comfortable across the seasons.

Moisture-wicking

Linen fibres are highly absorbent. It can absorb as much as 20 per cent of their weight in moisture before they start feeling wet, so linen bedding always feels fresh to the touch.

Linen fabric is often the first choice for those buying the household textile, as it is strong and practical. It is breathable, durable and easy-care and therefore is found in many homes.

Durable

Linen thread is twice as durable as cotton or wool. It's approximately 30% thicker and stronger than cotton. Lasting for decades, if properly cared for, it's an amazing investment for your home, not to mention, your sleep.

Hypoallergenic Material

Linen is the perfect choice for allergy sufferers and individuals with sensitive skin. Its natural, organic composition won't aggravate respiratory allergies, and the fabric's soft texture isn't itchy or uncomfortable.

PRODUCTION PROCESS

OTHER FIBERS

Linen Home uses other pure natural materials and recycled fibers as raw materials for our products.

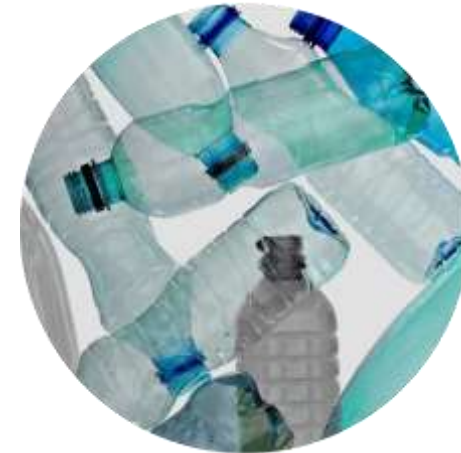

Cotton

Cotton fiber is widely used natural fiber. It is soft, fluffy, fresh, crisp, comfortable, absorbent and flexible

Bamboo

Bamboo fiber is sustainable, soft, and comfortable, with excellent anti-bacterial, moisture-wicking, and thermoregulating properties.

Recycled Polyester

Recycled polyester made from polyester waste such as plastic bottles. The most significant benefit is its lower environmental impact.

PRODUCTION CAPACITY

Linen Home has an integrated industrial chain production system from flax planting, spinning, weaving, printing& dyeing to finished product sewing.

Spinning

16,000 Spindles

Production capacity:
3,000 tons annually

Weaving

280 Weaving Looms

Production capacity:
700,000 yards per month

Dyeing

Dyeing line

Production capacity:
1,500,000 yards annually

SUSTAINABILITY

Our flax fabrics are Oeko-Tex 100, European Flax, GOTS, GRS and HIGG certified.
