

HENGSHUI BOHAI CHEMICAL TECHNOLOGY CO.,LTD. was founded in 1986 in Wuqiang County Chemical Industry Park, covering more than 30,000 square meters, existing staff 300 people, equipped with advanced technology, environmental protection facilities, with world-class testing method. With the annual production of dyes around 5000 tons, we are the the biggest basic dyestuff factory in China.

Our factory adopts advanced equipment and technology, strict management system to participate in market competition. Our company added several new plants in Hebei and Neimenggu, which producing cationic, acid, direct dyes, improved our quality to provide better service for customers.

Our factory is specialized in developing, manufacturing and marketing, which make ourselves a technological innovation-based environmental enterprise

We hope to establish a long-term business relationship, pursue win-win cooperation, promote common development.

Sincerely welcomes customers all over the world to cooperate and have business with us.
