

A Khatau Enterprise

**Getting to  
know Us**  
Company Overview

### **Mahendra Khatau**

Chairman and Managing Director

“Mahendra Khatau, the great grandson of Shri Khatau Makanji of the Khatau Group has been overseeing and steering Indokem’s growth and development for over 40 years. Driving the company towards a leading position in the industry, Mahendra Khatau has focused his efforts on achieving remarkable growth and developing company goodwill.”

## **Why Choose Us**

We are an ISO-certified company, providing sustainable solutions. Our clients continue to associate with us as we deliver customized products in an efficient, ecological and economical manner, covering a wide distribution network with technical support.

# INDOKEM At A Glance

We are a sizing chemicals, dyes, and textile auxiliaries manufacturing company. Our family-run enterprise holds a vast experience and presence in the market. We are one of the first companies in India that identified early on the growing textile industry.

Our commitment to quality products and emphasis on customer satisfaction dates back to the 1800s when a pioneer Mr Khatau Makanji had set up Khatau Makanji Spinning and Weaving Mills which is the parent company of Khatau group.

Following the success of this venture, the Khatau Group diversified into shipping and power cables while still marking an established presence in the textile sector. As a result, the Khatau group quickly gained a name of being one of the prominent business families in India.

Over the years, Indokem Pvt. Ltd. was set up as a member of the Khatau group in 1946. We are among the first in India to enter into the production of Dyes. It has since been a leader in the market of supplying textile dyes and chemicals in India. Our resourceful manufacturing capabilities, high-quality production, cost-effective price contributes to our extensive product portfolio.

## Vision

Indokem believes that quality is unparalleled as it ensures the success of our business. We aim to provide consistent quality in all our manufacturing and production processes, starting from conceptualization to execution. We emphasize upon our services ensuring customer satisfaction through uncompromising integrity, committed to delivering world-class products.

## Our Growth

We are a one-stop entity offering a complete range of products, serving several major clients across the globe. Our aim is to steadily develop existing capacities and provide a complete profile to all our clients. Therefore, we have developed the entire range of products comprising of sizing chemicals, textile auxiliaries, dyes, and pigment dispersions

# Corporate Philosophy

## Continuing to take on new challenges

### **We Believe**

In people and their unlimited potential in content and in focus on problem solving in teams for effective performance and in the power of intellect.

### **We Endeavor**

To select, train and coach people to obtain higher responsibilities; to nurture talent and to build leaders for the corporations of tomorrow. We reward, celebrate and activate all intellectual business contributions.

### **We Dream**

Of excellence in all endeavors of mutual benefit and prosperity of making the world a better place to live in.

# Solutions

**Indokem** is a reputed manufacturer, supplier, and exporter of Textile chemicals and dyes that are used in a variety of textile manufacturing processes in Industries. We offer a wide range of products like Sizing chemicals, Auxiliary chemicals, Dyes and Pigment dispersions.

## Dyes

This dyestuff is supplied in various forms to suit the intended mode of application. These vat dyes differ in tinctorial strength and fineness of dispersion. Powder, Ultra concentration and Acra concentration contain finely dispersed vat dyes, recommended for leuco vat dyeing. The colour of reduced vat dyes differs among different dyestuffs and is characteristic of the dyestuff from which it is produced.

Vat Dyes	Sulphur Liquid Dyes	Acid Dyes
Reactive Dyes	Sulphur Powder	
Direct Dyes	Disperse Dyes	

## Sizing Chemicals

Sizing chemicals are primarily applied on warp yarns to improve their performance during the weaving process. They are also used to enhance smoothness and decrease the intensity of hairiness on the warp yarns. Our sizing chemicals come as blends, binders, softeners, lubricants, antistatic liquids, and cold sizing.

Blends	Lubricants
Softeners	Antistatic
Binders	Cold Sizing

## Textile Auxiliaries

Our textile auxiliaries are applicable for pretreatment, dyeing, finishing and printing auxiliaries. They are primarily used for the washing and dyeing of yarns and fabrics. They are formulated for textile products in cationic, non-ionic, surfactants and amphoteric forms.

Pretreatment
Dyeing
Finishing
Printing

## Textile Pigments

Our Texoprint textile pigments come with specific fastness properties based on the varying range of shades. The lighter shades have a full colour spectrum, optimum particle size, good flow property and desired particle size distribution. The darker shades present more stable properties with a wide range of pH, attractive hue, good fastness properties, and are cost effective.

Textile Pigment

## Infrastructure

We have planned and set up an infrastructure that enables us to concentrate our efforts on manufacturing qualitative products at reasonable prices. We maintain Manufacturing with strict Quality Control and R&D processes to build and strengthen our client's trust and reliability on Indokem.

## Manufacturing

We focus on the manufacturing of sizing chemicals, textile auxiliaries, textile dyes and pigment dispersions. We have five strategic business units around Mumbai to produce, process and dispatch all materials. Our overall production capacity is 35,000 metric tons per year. Our technical team ensures innovating new products and processes to help better serve our clients. We have a diversified range of products designed to ensure international standards of quality and customer satisfaction.

## R&D

We have highly innovative and experienced team in R&D, QA and Production. The teams strive to consistently develop products and application methods as required by the market. The aim is to minimize waste production, shortening production processes and improving existing products.

## Environmentally Conscious

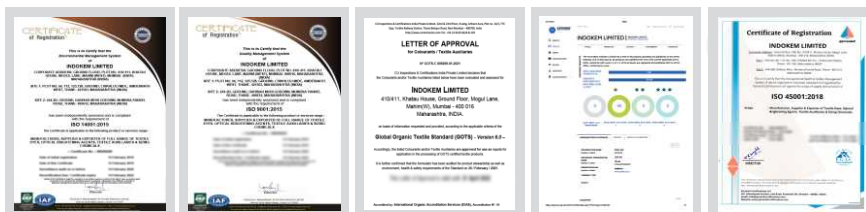

We are among the few companies in the textile industry that support sustainable practices through our manufacturing and production processes. We make sure to comply with the norms and regulations designed to ensure that environment-friendly operations are carried out.

We are moving away from long chain molecules and proceeding towards short chain molecules, thus increasing bio degradability. We offer products that enable our clients to use less water and energy in their processes.

## Certification

All Products manufactured by Indokem are under registered trade names comply with European standards

# Quality Control

We understand that quality is the most crucial factor to affect our client's purchase decision.

To ensure that quality remains paramount among our products, we have installed high tech instrumentation and have adopted process control measures to monitor every stage involved in the manufacturing process. The entire quality control program is supervised by our quality controllers who consistently and stringently test the entire range of products. The products are tested based on various parameters to ensure superior performance and durability.
